

# UPPER MATTAGAMI HYDROELECTRIC GENERATING STATION REDEVELOPMENTS

## WAWAITIN, SANDY FALLS AND LOWER STURGEON

Ontario Power Generation Inc. (OPG) is proposing to redevelop three hydroelectric generating stations on the Upper Mattagami River on the sites of the existing generating stations at Wawaitin, Sandy Falls, and Lower Sturgeon (the Proposed Undertaking). The Proposed Undertaking will replace certain obsolete and end of service life facilities at these existing 25 cycle generating stations. When completed, the combined capacity of the new generating stations will be approximately 35 megawatts and will produce electricity at 60 cycles which can be used directly in the local distribution system. All three generating stations are located on the Upper Mattagami River System within 50 kilometres of the City of Timmins (see map).

The Proposed Undertaking consists of the following: A new powerhouse will be built at each site. There will also be some refurbishments and modifications made to the existing civil works such as the dams and weirs at each generating station. The existing powerhouses and associated electricity connections will be decommissioned.

The redeveloped generating stations will continue to meet operating requirements identified in the Water Management Plan for the Mattagami River. The Proposed Undertaking will improve reliability, improve efficiency and increase capacity of the existing renewable resource, while reusing and upgrading existing civil infrastructure. The generating stations will continue to operate as run-of-the-river facilities and be managed so that there is no change to the water levels and flows.

The project is subject to the requirements of OPG's Class Environmental Assessment for Modifications to Hydroelectric Facilities under the *Ontario Environmental Assessment Act*. In addition, a number of environmental permits and approvals may be required including approvals from the Ontario Ministry of the Environment and the Ontario Ministry of Natural Resources.

### YOU ARE INVITED TO ATTEND AN OPEN HOUSE ON WEDNESDAY OCTOBER 18, 2006

Consultation will take place through the environmental approval process. OPG is committed to consulting with the respective First Nations, government agencies, the public and other interested stakeholders on the Proposed Undertaking. Input and comments will be considered and included in the preparation of the Environmental Assessment Report.

To encourage public participation, OPG will be holding an open house in Timmins to provide the parties the opportunity to speak directly with representatives of OPG and its environmental consulting team. **The Open House will be held on Wednesday, October 18, McIntyre Arena – MAC Auditorium, Timmins, 3:00 – 8:00 PM. Presentation will be given at 6:45PM.**

OPG has retained SENES Consultants Limited of Richmond Hill, Ontario to undertake the environmental assessments. For more information on the Proposed Undertaking or to be included in our mailing list please contact: **Ed Dobrowolski**, Project Manager, 700 University Avenue, H18 C16, Toronto, Ontario, M5G 1X6: (416) 592-3266, e-mail: [info@uppermattagami-ea.com](mailto:info@uppermattagami-ea.com); or **Phil Shantz**, Senior Planner, SENES Consultants Limited, 121 Granton Drive, Richmond Hill, Ontario, L4B 3N4, telephone: (905) 764-9380, e-mail: [info@uppermattagami-ea.com](mailto:info@uppermattagami-ea.com).
